FOR IMMEDIATE RELEASE:

**NU FLOW ANNOUNCES ADDITION OF INFRASTRUCTURE SPECIALIST AS CFO
Appointment of Chief Financial Officer Positions Company for Market Expansion**

San Diego, CA – (February 4, 2008) – The Nu Flow Group of Companies announced today that it has concluded its search for a highly-qualified senior executive with the appointment of Eric Palmer, CA, CMA, to the position of Chief Financial Officer. Nu Flow, which has consistently grown its revenues since its launch in 2000, has been actively expanding its senior management team as it looks to capitalize on its market opportunity. Palmer was selected from a group of exceedingly competent candidates because of his proven ability to fuel and manage growth in emerging companies, transforming them into leading industry players

Most recently, Palmer was Senior Vice President of Corporate Development where he led the mergers and acquisition activities of telecom provider Subex. Prior to his role at Subex, Palmer served as Chief Financial Officer and Senior Vice President of Operations at technology company Syndesis Limited, where he successfully restructured the company and led the acquisition and integration of several technologies that culminated in the sale of Syndesis to a strategic investor. Prior to his role at Syndesis, Palmer completed a number of acquisitions and public transactions, including an initial public offering, with high-tech company MKS.

Palmer has been tasked with expanding Nu Flow's existing business platform through both organic and inorganic methods and helping to define the company's future. Palmer accepted this challenge with enthusiasm. "In considering the CFO position, I was particularly intrigued by the company's performance record," Palmer stated. "Nu Flow has a demonstrated ability to recognize and assimilate opportunities and convert these into solutions which benefit not only Nu Flow's customers, but also the industry as a whole." Palmer believes that because of its unique green technologies, Nu Flow will emerge as one of the most compelling growth companies over the coming decade.

With the CFO position filled and the final piece of corporate infrastructure in place, Nu Flow expects to continue its significant growth in 2008 and emerge as the most prominent industry player in the residential and commercial pipe restoration markets.

About Nu Flow

The Nu Flow group of companies offers innovative green technologies for the rehabilitation of the inner infrastructure of pipe and water systems. Nu Flow is the only entity that manufactures and installs lining for drinking water pipes, sewer restoration products, and whole-structure bio water filtration around the world. Lining applications range from domestic water piping, HVAC and drain systems, military fire sprinkler systems and conduit, to underground utilities and lead service piping. An industry pioneer in the “one-stop-shop” concept, Nu Flow is the first and only company to combine green technology solutions in the water infrastructure and water filtration industries from a single source.
