FOR IMMEDIATE RELEASE:

NU FLOW ADDS DEPTH AND TALENT TO SENIOR MANAGEMENT TEAM WITH APPOINTMENT OF CHIEF OPERATING OFFICER

San Diego, CA – (September 23, 2008) – The Nu Flow Group of Companies announced today the appointment of Stephen Stoppenbrink, a seasoned professional with more than 25 years of experience managing multi-million dollar companies, as Chief Operating Officer. This appointment to Nu Flow’s senior management team provides additional C-level support as the Company further expands its market leadership position.

Stoppenbrink’s proven ability to drive profit and market share growth by implementing operations efficiencies while at the same time generating exponential sales gains, was a key factor in Nu Flow’s hiring decision. As Chief Operating Officer, Stoppenbrink will oversee Nu Flow’s entire installations organization with the objective of streamlining operations and maximizing efficiency and capacity.

“Stephen’s impressive operational experience and growth perspective is the perfect complement to the extensive industry and technology expertise held by other members of the senior management team,” said Nu Flow President Cameron Manners. “With his addition, Nu Flow is perfectly poised to fulfill its goal of ownership of the inside infrastructure rehabilitation market.”

Prior to joining Nu Flow, Stoppenbrink served as President and Chief Executive Officer of Hyd-Mech Group, Ltd., a \$35M global leader in design and technology based in Ontario, Canada. During his tenure at Hyd-Mech, Stoppenbrink restored the company to a +10% profitability from a negative EBITDA in one year, doubled the company’s sales, and penetrated and expanded growth in new and existing markets in more than 20 countries. Before joining Hyd-Mech, Stoppenbrink held the Vice President of Operations position at Doall Industrial Supply, a \$275M international leader in distribution of metal-working supplies, where he secured the largest contract in the company’s history.

“Nu Flow’s innovative technology, knowledgeable employees and impressive growth trajectory were definitely elements that attracted me,” explains Stoppenbrink. “As part of the Nu Flow team, I am looking forward to the exciting ride ahead as the company moves from industry pioneer to dominant industry player.”

About Nu Flow

The Nu Flow group of companies offers innovative green technologies for the rehabilitation of the inner infrastructure of pipe and water systems. Nu Flow is the only entity that manufactures and installs lining for drinking water pipes, sewer restoration products, and whole-structure bio water filtration around the world. Lining applications range from domestic water piping, HVAC and drain systems, military fire sprinkler systems and conduit, to underground utilities and lead service piping. An industry pioneer in the “one-stop-shop” concept, Nu Flow is the first and only company to combine green technology solutions in the pipe lining and water filtration industries from a single source.
